Dear Parent,

Bal Bharati Public School, is always looking to adopt new initiatives which can help our children improve their learning and performance. In this endeavour, we are introducing "Funtoot" - an intelligent and adaptive personalized learning solution for mathematics that will help every child.

Every child is unique and this uniqueness has both static and temporal dimensions. As a child one may have higher attention span but low IQ. Another may have higher grasp but low interest. One may have high IQ but lower speed. Another may have higher attention span in linear equations but poor in geometry. One may have poor proficiency on dependant topics but, like the current topic very much.

Every child will be issued individual login ids & passwords. The first time a child logs in to the system, the system measures his/her IQ, likes and interests through a set of non-academic questions and thereafter generates questions and tutoring guides as per the level and areas of interest.

In school, our teachers will teach and then assign Mathematics topics to the class, for practice at home and school. The children can then practice on the same topic through **Funtoot at home**. They will also receive remedial / tutoring wherever & whenever they find it difficult to solve a question. It is like an assistant teacher / tutor with the child at his/her beck and call. Detailed analysis reports will be generated and shared with teachers. Parents can also see the detail progress being made by their child regularly.

We have seen very positive interest from students in the trial that we did in school.

This is a paid programme but we are not going to charge any additional fee for this programme in the current session. Programme is being offered to some students in each section and depending on the feedback we will decide to run the programme for all students of class III to VIII in the next academic session on payment of a small fee in the beginning of the session.

I am sure you will appreciate this initiative and will motivate your child to make best use of this facility.

I will also look forward to your comments/feedback on my personal email (lvsehgal@gmail.com).

With sincere regards and best wishes

Yours Sincerely

LV Sehgal
Principal
